Notice of Hearing on Proposed Administrative Regulations

A public hearing will be conducted at 9:30 a.m. Wednesday, October 27, in the MTAA conference room in the airport terminal building, Forbes Field, Topeka, to consider proposed amendments to regu-

lations K.A.R. 28-46-1 through 28-46-44.

These regulations have not been updated since May 1986. In July 1988, the Environmental Protection Agency adopted new regulations implementing significant new requirements for the siting, permitting, construction, testing, operation, monitoring, reporting and closure of Class I hazardous waste injection wells, an additional test known as the formation pressure fall-off test for both Class I hazardous and non-hazardous waste injection wells, and additional public notice requirements for all Class I injection well major permit activity. KDHE is adopting the federal regulations in order to remain consistent with the federal regulations and to maintain proper authority to regulate Class I injection wells. In addition, KDHE is increasing the area of review requirements for Class I injection wells to check for abandoned, unplugged or improperly plugged wells that may be influenced by the injection zone. KDHE is also clarifying the pressure mechanical integrity test procedure for Class III wells to require the use of a retrievable packer or plug.

There will be an economic impact on Kansas Class I injection well owners or operators, although by means of the underground injection control (UIC) permits the requirements of the proposed amended regulations were implemented several years ago for the facilities to be in compliance with federal UIC program requirements. The permittee must comply with federal requirements regardless of whether the federal regulations are adopted by KDHE. The cost of the testing required by the amended regulations is estimated to be \$7,500 annually per Class I non-hazardous waste injection well facility, and for a Class I hazardous waste injection well facility costs are estimated at \$57,500 annually plus an additional \$50,000 once every five years. These tests are required to remain in compliance with federal UIC program requirements. The cost estimates do not include any loss of revenue while the wells are out of operation during the testing.

Copies of the proposed regulations and a complete economic impact statement may be obtained by contacting Michael Cochran, Bureau of Water, Department of Health and Environment, Forbes Field, Building 740,

Topeka 66620-0001.

The time period between the publication of this notice and the scheduled hearing constitutes a public comment period for the purpose of receiving written public comments on the proposed regulations. All interested parties may submit such comments prior to the hearing to the address above. All interested parties

also will be given a reasonable opportunity at the hearing to present their views, orally or in writing, concerning the adoption of the proposed regulations. In order to give all persons an opportunity to present their views, it may be necessary to limit oral presentations to five minutes.

Following the hearing, all written and oral comments submitted by interested parties will be considered as the basis for making changes in these proposed regulations.

The principal of the bonds will be payable at maturity or upon earlier redemption to the registered owners upon presentation and surrender of the bonds at the office of the paying agent. Interest on the bonds will be paid by check or draft mailed by the paying agent to the persons in whose names the bonds are registered on the registration books maintained by the bond registrar at the close of business on the record date for such interest, which shall be the 15th day (whether or not a business day) of the calendar month next preceding such interest payment date.

The county will pay for the fees of the bond registrar for registration and transfer of the bonds and will also pay for printing a reasonable supply of registered bond blanks. Any additional costs or fees that might be incurred in the secondary market, other than fees of the

(continued)

bond registrar, will be the responsibility of the bondholders.

Redemption of Bonds Prior to Maturity

At the option of the county, bonds maturing on December 1, 1999, and thereafter will be subject to redemption and payment prior to maturity on December 1, 1998, and thereafter in whole on any date or in part on any interest payment date (bonds of less than a single maturity to be selected by lot in multiples of \$5,000 principal amount by the paying agent and bond registrar in such equitable manner as it shall designate), at the principal amount thereof, plus accrued interest to the redemption date, without premium.

Whenever the county is to select the bonds for the purpose of redemption, it shall, in the case of bonds in denominations greater than \$5,000, if less than all of the bonds then outstanding are to be called for redemption, treat each \$5,000 of face value of each such fully registered bond as though it were a separate bond of the denomination of \$5,000.

If the county shall elect to call any bond for redemption and payment prior to the maturity thereof, the county shall give written notice of its intention to redeem and pay said bonds on a specified date, the same being described by number and maturity, said notice to be mailed by United States registered or certified mail addressed to the paying agent and bond registrar, and to the manager or managers of the underwriting account making the successful bid, each of said notices to be mailed at least 30 days prior to the redemption date. Thereafter, the paying agent and bond registrar will notify the owners of the bonds of the county's redemption call by United States mail, postage prepaid. If any bond be called for redemption and payment as aforesaid, all interest on such bond shall cease from and after the date for which such call is made, provided funds are available for its payment at the price hereinbefore specified.

Conditions of Bids

Proposals will be received on the bonds bearing such rate or rates of interest as may be specified by the bidders, subject to the following conditions: The same rate shall apply to all bonds of the same maturity. Each interest rate specified shall be a multiple of 1/8 or 1/20 of 1 percent. No interest rate shall exceed the index of treasury bonds published by The Bond Buyer in New York, New York, on the Monday next preceding the day on which the bonds are sold, plus 2 percent. The difference between the highest rate specified and the lowest rate specified shall not exceed 2 percent. No supplemental interest payments will be authorized. No bid of less than the principal amount of the bonds and accrued interest will be considered. Each bid shall specify the total interest cost to the county during the life of the bond issue on the basis of such bid, the premium, if any, offered by the bidder, and the net interest cost to the county on the basis of such bid. Each bid shall also specify the average annual net interest rate to the county on the basis of such bid. Bidders shall specify in the bid form the prices (exclusive of accrued interest), expressed as a dollar price, at which the bidder intends that each maturity

amount of the bonds shall be initially offered to the public (the initial reoffering prices).

Basis of Award

The award of the bonds will be made on the basis of the lowest net interest cost to the county, which will be determined by subtracting the amount of the premium bid, if any, from the total interest cost to the county. If there is any discrepancy between the net interest cost and the average annual net interest rate specified, the specified net interest cost shall govern and the interest rates specified in the bid shall be adjusted accordingly. If two or more proper bids providing for identical amounts for the lowest net interest cost are received, the county shall determine which bid, if any, shall be accepted, and its determination shall be final.

Security for the Bonds

The bonds will be general obligations of the county payable as to both principal and interest payable from ad valorem taxes which may be levied, without limitation as to rate or amount on all the taxable tangible property, real and personal, within the territorial limits of the county.

Internal Revenue Code of 1986

The Internal Revenue Code of 1986 imposes requirements on the county which must be met subsequent to the issuance of the bonds by the county and, as a result, the county will and does hereby covenant that it will diligently undertake those steps necessary to maintain the tax-exempt status of the bonds. The county's failure to comply with such requirements could adversely affect the tax-exempt status of the bonds. Purchasers of the bonds should be aware that should the bonds lose their status as tax-exempt obligations as a result of the county's failure to comply with such requirements, the bonds are neither callable nor will the rate of interest on the bonds be adjusted to reflect such circumstance.

The code includes interest on tax-exempt obligations, such as the bonds, in the adjusted current earnings of certain corporations in the calculation of alternative minimum taxable income, with certain other adjustment. Furthermore, Section 59A of the code, as added by the Superfund Amendments and Reauthorization Act of 1986, provides for an environmental tax generally based on corporate alternative minimum taxable income. The amount of the tax is equal to 0.12 percent of the excess of alternative minimum taxable income, without regard to net operating losses and the deduction for this tax, over \$2 million. The environmental tax is imposed whether or not the taxpayer is subject to the alternative minimum tax. The environmental tax may subject certain bondowners to additional taxation for interest earned on the bonds.

The code also requires property and casualty insurance companies to reduce the amount of their deductible underwriting losses by a percentage of the amount of tax-exempt interest received or accrued on such obligations. With the exception of certain "qualified tax-exempt obligations," the code provides that banks and thrift institutions may not deduct any por-

tion of the interest cost of purchasing or carrying taxexempt obligations such as the bonds. The county does intend to designate the bonds as "qualified tax-exempt obligations" under Section 265 of the code.

Legal Opinion

The bonds will be sold subject to the legal opinion of Nichols and Wolfe Chartered, Topeka, Kansas, bond counsel, whose approving legal opinion as to the validity of the bonds will be furnished and paid for by the county, printed on the bonds and delivered to the successful bidder when the bonds are delivered. Said opinion will also state that in the opinion of bond counsel, assuming continued compliance by the county with the provisions of the resolution authorizing the issuance of the bonds and the code, under existing law, the interest on the bonds is exempt from federal income taxation. Interest on the bonds will also be excluded from the computation of Kansas adjusted gross income.

Delivery and Payment

The county will pay for printing the bonds and will deliver the bonds, without cost to the successful bidder, properly prepared, executed and registered, on or about October 28, 1993, at such bank or trust company in the state of Kansas or greater Kansas City, Missouri, metropolitan area as may be specified by the successful bidder. Delivery elsewhere will be at the bidder's expense. Said bidder will also be furnished with a certified transcript of the proceedings evidencing the authorization and issuance of the bonds and the usual closing documents, including a certificate that there is no litigation pending or threatened at the time of delivery of the bonds affecting their validity and a certificate regarding the completeness and accuracy of the official statement. Payment for the bonds shall be made in Federal Reserve funds, immediately subject to use by the county. The denominations of the bonds and the names, addresses and social security or taxpayer identification numbers of the registered owners shall be submitted in writing by the successful bidder to the county and bond registrar not later than 3 p.m. C.D.T. on October 6, 1993. In the absence of such information. the county will deliver bonds in the denomination of each maturity registered in the name of the successful bidder.

The successful bidder shall furnish the county by 3 p.m. C.D.T. on October 6, 1993, a certificate acceptable to the county's bond counsel to the effect that (i) the successful bidder has made a bona fide public offering of the bonds at the initial reoffering prices, and (ii) a substantial amount of the bonds was sold to the public (excluding brokers and other intermediaries) at such initial reoffering prices. Such certificate shall state that (1) it is made on the best knowledge, information and belief of the successful bidder, and (2) 10 percent or more in par amount of the bonds of each maturity was sold to the public at or below the initial reoffering prices (such amount being sufficient to establish the sale of a "substantial amount" of the bonds).

Good Faith Deposit

Each bid shall be accompanied by a cashier's or certified check drawn on a bank located in the United

States of America in the amount of \$3,000, payable to the order of the county to secure the county from any loss resulting from the failure of the bidder to comply with the terms of the bid. No interest will be paid upon the deposit made by the successful bidder. Said check shall be returned to the bidder if the bid is not accepted. If a bid is accepted, said check shall be held by the county until the bidder shall have complied with all of the terms and conditions of this notice, at which time said check shall, at the option of the county, be returned to the successful bidder or deducted from the purchase price. If a bid is accepted but the county shall fail to deliver the bonds to the bidder in accordance with the terms and conditions of this notice, said check shall be returned to the bidder. If a bid is accepted but the bidder shall default in the performance of any of the terms and conditions of this notice, the proceeds of such check shall be forfeited to the county, and the county reserves the right to pursue any consequential damages as a result of such default.

CUSIP Numbers

CUSIP identification numbers will be printed on the bonds, but neither the failure to print such number on any bond nor any error with respect thereto shall constitute cause for failure or refusal by the purchaser thereof to accept delivery of and pay for the bonds in accordance with the terms of this notice. All expenses in relation to the assignment and printing of CUSIP numbers on the bonds will be paid by the county.

Bid Forms

All bids must be made on forms which may be procured from the county clerk. No additions or alterations in such forms shall be made, and any erasures may cause rejection of any bid. The county reserves the right to waive irregularities and to reject any or all bids.

Submission of Bids

Bids must be submitted in sealed envelopes addressed to the undersigned county clerk and marked "Proposal for the Purchase of General Obligation Bonds." Bids may be submitted by mail or delivered in person to the undersigned at the Trego County Courthouse and must be received by the undersigned prior to noon C.D.T. on Thursday, September 30, 1993.

Article 19.—AMBIENT AIR QUALITY STANDARDS AND AIR POLLUTION CONTROL

28-19-31. Emission limitations. Subject to the provisions of regulations 28-19-9 and 28-19-11: (a) A person shall not cause or permit the emission of particulate matter exceeding the specifications in table H-1 of this regulation.

TABLE H-1—Emission Limits for Indirect Heating Equipment

	tal input 6 BTU/hr	Allowable* lb/106 BTU	Total input 106 BTU/hr	Allowable* lb/106 BTU

A			or more	

 $^{\circ}$ The allowable emission rate for equipment having intermediate heat input between 10 (106) BTU/hr and 10,000 (106) BTU/hr may be determined by the formula:

 $A = \frac{1.026}{1.233}$

Where: A = the allowable emission rate in $lb/10^6$ BTU I = the total heat input in 10^6 BTU/hr.

- (b) A person shall not cause or permit visible contaminant emissions from any indirect heating equipment which equals or exceeds the following opacities:
 - (1) Existing equipment: 40 percent opacity:(2) New equipment: 20 percent opacity.
- (c) A person responsible for operation of any indirect heating equipment having a heat input of 250 million BTU/hr or greater shall not cause or permit the emission of more than 3.0 pounds of sulfur dioxide per million BTU of heat input unless an alternative sulfur dioxide emission limit applicable to such indirect heating equipment is specified in a permit issued pursuant to K.A.R. 28-19-14. The operation of any indirect heating equipment for which an alternative sulfur dioxide emission limit has been specified by permit pursuant to this subsection shall be in compliance with such alternative sulfur dioxide emission limit on and after the effective date of the permit limitation in lieu of the 3.0 pounds of sulfur dioxide per million BTU of heat input limit specified in this subsection. Any alternative sulfur dioxide emission limit specified in a permit must be adequate to protect the ambient air quality standards for sulfur dioxide, and shall not be deemed an applicable implementation plan requirement under the federal clean air act until approved pursuant to section 110 of the act (42 U.S.C. §7410).
- (d) A person responsible for operation of any gas or oil-fired indirect heating equipment having a heat input of 250 million BTU/hr or greater shall not cause or permit the emission of more than 0.30 pounds of nitrogen oxides per million BTU of heat input per hour.
- (e) A person responsible for operation of any coal fired indirect heating equipment having a heat input of 250 million BTU/hr or greater shall not cause or

permit the emission of more than 0.90 pounds of nitrogen oxides (calculated as NO₂) per million BTU of heat input per hour. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective Jan. 1, 1971; amended Jan. 1, 1972; amended, E-73-8, Dec. 27, 1972; amended Jan. 1, 1974; amended May 1, 1986; amended Nov. 8, 1993.)

28-19-32. Exemptions—indirect heating equipment. (a) Visible contaminant emissions of an opacity exceeding that allowed in K.A.R. 28-19-31(b) shall not be considered a violation of that section provided that the person responsible for operation of the indirect heating equipment demonstrates to the satisfaction of the department that this excessive opacity is solely the result of the presence of uncombined water in the plume.

(b) Indirect heating equipment which was existing on January 1, 1972, shall be exempt from the provisions of K.A.R. 28-19-31(d) and K.A.R. 28-19-31(e). (Authorized by K.S.A. 65-3005; implementing K.S.A. 65-3007, 65-3010; effective Jan. 1, 1971; amended Jan. 1, 1972; amended, E-73-8, Dec. 27, 1972; amended Jan. 1, 1974; amended May 1, 1981; amended May 1, 1982; amended Nov. 8, 1993.)

28-19-63. Automobile and light duty truck surface coating. (a) The provisions of this regulation shall be applicable to each automobile or light duty truck top coat and primer surfacer surface coating operation and all other automobile or light duty truck surface coating application systems at those facilities which have a VOC potential contaminant emission rate equal to or greater than three tons per year. For the purposes of this rule, surface coating operation means the combination of all coating application systems which apply the specific class of surface coatings identified at table A of subsection (b). The VOC potential contaminant emission rate of a facility shall be determined by:

- (1) the maximum hourly production rate of each coating application system; and
- (2) the assumption that the facility operates 24 hours per day, 365 days per year provided that the facility's operating hours are not otherwise limited by federally enforceable permit conditions.
- (b) An owner or operator of any facility subject to this regulation shall not:
- (1) conduct any surface coating operation that emits VOC to the atmosphere in excess of the amount specified in table A below:

Table A VOC Emission Limits Based on Solids Applied

Surface Coating Operation

Emission Limit (Pounds of VOC/Gal. of Solids Applied) 15.1

(2) operate any surface coating application system that emits VOC to the atmosphere in excess of the amount specified in table B below.

(c) Use of additional VOC shall be considered as follows:

(1) for determining the potential contaminant emission rate of the facility in accordance with subsection (a), include that added for thinning coatings and that used for purging or washing coating applicators which cannot be otherwise accounted for in a reclamation system; and

(2) for compliance with subsection (b), include that

added for thinning coatings.

(d) The emission limits which will result from the use of coatings in subsection (b) shall be achieved by:

(1) application of coatings which meet or exceed the characteristics of the coatings in table B of subsection (b) per coating application system on a daily weighted average basis. For the purpose of this subsection (d)(1), "daily weighted average" is the total weight of VOC emitted from a coating application system per day, divided by the volume of coating used per day, or

(2) application of coatings to achieve equivalent emissions based on the weight of VOC emitted per gallon of solids applied as specified in table A of subsection (b). For purposes of subsection (d)(2), "daily weighted average" is the total weight of VOC emitted for a surface coating operation per day, divided by the volume of solids applied per day as determined by procedures described in the publication referenced in

(t); oi

(3) application, for the capture and reduction of VOC emissions through either destruction or collection, of emission control equipment demonstrated through testing as capable of maintaining an overall VOC emission reduction necessary to meet the emission requirements of subsection (b). Use of emission control equipment shall require that continuous monitors be installed, calibrated, operated and maintained. Maintenance records of the monitors shall be kept and made available for department inspection. The monitors shall continuously measure and record the following parameters:

(A) with an accuracy of the greater of \pm 0.75 percent of the temperature being measured expressed in degrees Celsius, or 2.5 degrees Celsius, the exhaust gas temperature of all VOC destruction devices and the gas temperature immediately upstream and down-

stream of any catalyst bed;

(B) with an accuracy of ± 2.00 percent of the amount being monitored, the cumulative amount of VOC recovered during a calendar month for all VOC recovery equipment; and

(C) any other parameters considered necessary by the department to verify proper operation of emission

control equipment; or

(4) any combination of methods approved by the department which results in emissions, when calculated as pounds of VOC per gallon of solids applied per coating application system, that are no greater on a daily weighted basis than those achieved with the appropriate coatings specified in table B of subsection (b)

- (e) Prior to 180 days after a facility becomes subject to the provisions of this regulation, the owner or operator of the facility shall demonstrate, at the expense of the owner or operator, initial compliance with this regulation by testing. An owner or operator proposing to conduct testing shall notify the department, in writing, of the intent to test not later than 30 days prior to the proposed date of testing. The owner or operator shall submit to the department any information about the proposed test requested by the department. The department may require, at any time necessary to determine compliance with this regulation, the owner or operator of any facility subject to this regulation to demonstrate compliance by testing, and at the expense of the owner or operator. Testing, for purposes of this regulation, shall be approved by the department and consistent with:
- (1) 40 CFR Part 60, appendix A, as in effect July 1, 1989; and

(2) procedures as established by the department in approving proposed test plans consistent with subsec-

tion (e)(1).

- (f) Demonstration of continual compliance per top coat and primer surfacer surface coating operations achieved by subsection (d)(2) shall be based on the procedures in the publication "protocol for determining the daily volatile organic compound emission rate of automobile and light-duty truck topcoat operations," published in EPA document no. EPA-450/3-88-018 (December 1988).
- (g) Demonstration of continual compliance per coating application system not covered by subsection (f), achieved by subsection (d)(3) or (d)(4) shall be based on the finding that the results obtained by the formula in (2) are equal to or less than the results obtained by the formula in (1), both results on a daily weighted average basis.
- (1) complying coating equivalent emissions expressed as:

VOC, lbs	=	EL	, is
gal. of solids applied		(VS)(TE)	• .

EL = the coating characteristics established by this regulation, expressed as pounds of VOC per gallon of coating, less exempt VOC and water.

VS = volume fraction of solids in EL, expressed as a decimal, where the density of coating solvents is assumed to be 7.36 pounds per gallon, less exempt VOC and water.

TE = baseline transfer efficiency as defined at K.A.R. 28-19-61, expressed as a decimal.

(2) actual coating equivalent emissions expressed as: (continued)

 $\frac{\text{VOC, lbs}}{\text{gal. of solids applied}} = \frac{\text{AC (1-E)}}{\text{(vs)(te)}}$

AC = pounds of VOC per gallon of the coating as delivered to the coating application system, less exempt VOC and water.

E = the demonstrated efficiency of installed vapor processing system determined by the actual vapor collection system efficiency multiplied by the actual VOC emission control device efficiency, expressed

as a decimal.

vs = volume fraction of solids of the coating as delivered to the coating application system, expressed as a decimal. For water-borne coatings, the volume fraction of solids is determined without water.

te = the demonstrated transfer efficiency of the coating application system, expressed as a decimal.

The owner or operator shall determine AC and vs: 1) by using 40 CFR Part 60, appendix A, reference method 24, as in effect July 1, 1989, and data supplied by the coating manufacturer adjusted by the VOC used for thinning purposes; or

2) from analysis of coating as applied. The analysis shall be conducted by the owner or operator in accordance with reference method 24, as in effect July 1, 1989. If manufacturers formulation data is used, verification of the data may be required by reference method 24, or a department approved equivalent method, and at the expense of the owner or operator.

(h) The owner or operator of each emission unit within a facility subject to this regulation shall keep and maintain records at the facility and make available for inspection by a department representative to determine continuous compliance of the facility with this

regulation.

(1) In order to demonstrate compliance for surface coating operations under table A of subsection (b), the records used to complete the calculations found in EPA document no. EPA-450/3-88-018 referenced at subsection (f) shall be kept at the facility for two years following the date of record.

(2) In order to demonstrate compliance for coating application systems under table B of subsection (b), the records shall include the following information and shall be kept at the facility for two years following the

date of record:

(A) the type and amount of coatings and thinning solvents delivered daily to each coating application system. The daily record-keeping requirements of this subsection may be waived if the owner or operator:

(i) demonstrates that it uses only coatings that have been determined to be in compliance with table B of subsection (b) of this regulation; and

(ii) has received written approval from the depart-

ment for a waiver from this requirement;

(B) the manufacturer's coating formulation data, and other test data, including density, weight percent volatiles (as determined using a one hour bake), weight percent water, and weight percent exempt VOC, determined by reference method 24 for each coating;

(C) the coating's solids content, as delivered to the coating application system in volume percent;

(D) the results of any testing conducted at the facility pertaining to transfer efficiencies, capture efficiencies or control equipment reduction efficiencies;

(E) the type, density and amount of solvents used each month for purge and equipment cleaning;

(F) amount and density of waste solvents reclaimed;

(G) those records as required in subsections (d)(3)(A) through (d)(3)(C).

(i) The owner or operator of a facility shall comply with all emission limits within 180 days after the facility

becomes subject to the provisions of this regulation. (j) The provisions of this regulation shall be applicable only to affected facilities located in areas which have been identified as not meeting the national primary ambient air quality standard for ozone in the manner prescribed by the provisions of section 107(d) of the federal clean air act, 42 U.S.C. 7407 as promulgated at 40 CFR Part 81 as in effect July 1, 1986 and amended at 51 Fed. Reg. 25,200 July 11, 1986. (Authorized by and implementing K.S.A. 65-3005, 65-3010; effective, E-81-28, Sept. 10, 1980; effective May 1, 1981; amended May 1, 1986; amended, T-88-55, Dec. 16, 1987; amended May 1, 1988; amended Nov. 8, 1993.)
